Notes on the replication data set

1. All data files are in Stata version 11. Do-files run in Stata version 11.
2. Data sources for all variables are described in Appendix 1 of the paper. All key variables have been labeled within each Stata data file.
3. The do-file *IMMT\_20110220.do* generates the results used in the paper. The following table describes the data files needed to generate the results in each table, and the file where the output is stored in a text file.

Table	Data files used	Output stored in
1	<b>Tables1to5.dta</b>	<b>Table1.txt</b>
